

ARDHENDU SEKHAR SAHOO

+91 6372736373 ◇ Paradip, Odisha, India

ardhendusekharsahoo31@gmail.com ◇ <https://www.linkedin.com/in/ardhendu-sekhar-sahoo> ◇ [Portfolio](#)

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, HTML/CSS
Frameworks/Library: FastAPI, Django, Node.js (Express), React, Laravel
AI Systems: RAG, LLM Integration, LangGraph, Prompt engineering

EXPERIENCE

Software Developer at Auroinfo Private Limited, Bhubaneswar, Odisha Dec 2024
Software Developer at AlumNetworks Private Limited , Bhubaneswar, Odisha Jun 2023 - Nov 2024
Junior Software Developer at Hyscaler, Bhubaneswar, Odisha Apr 2022 - May 2023

PROJECTS

AwareNow: Architected and built a scalable AI-powered civic intelligence platform that converts long-form government meeting transcripts into structured, searchable summaries using OpenAI APIs.

- Designed asynchronous processing pipelines using Django, PostgreSQL, and Celery to handle high-volume transcript ingestion, ensure reliable AI task execution, and maintain low API latency under concurrent user load.
- Optimized database indexing and query performance to enable fast retrieval of summarized meeting insights.

Namaste Westside (In Progress): Built a conversational AI engine using Dialogflow CX to handle multi-turn user interactions with contextual intent recognition and dynamic response generation.

- Developed modular RESTful backend services to generate personalized travel itineraries through fulfillment logic and structured API design.
- Engineered a responsive React frontend integrated with backend APIs, enabling real-time itinerary updates and seamless user interaction workflows.

Atompass: Led end-to-end development of a security-first password management platform with encrypted credential storage and hardened authentication architecture.

- Engineered secure authentication flows, data encryption mechanisms, role-based access control, and robust session management to protect sensitive user information.
- Successfully migrated users from V1 to V2 with upgraded security architecture, ensuring zero data loss and seamless transition through structured data migration and validation strategies.

Proxtal: Led development of a production-grade AI-powered hiring and collaboration platform for the infrastructure sector, implementing intelligent content generation workflows and an AI support chatbot to streamline user onboarding and engagement.

- Engineered real-time messaging, professional networking, and event-driven notification systems using scalable backend architecture to enable seamless collaboration and project discovery.
- Designed secure authentication mechanisms and role-based access control to support enterprise-grade user management across the platform.

RoleMatch (Personal): Built an production-ready personalized AI-powered recommendation engine using semantic vector search and LLM-based contextual scoring to match candidate profiles with relevant job opportunities.

- Designed orchestration workflows using FastAPI and LangGraph to automate multi-source job ingestion, resume parsing, and contextual relevance scoring.
- Deployed containerized microservices integrated with Supabase for scalable storage, and built a Streamlit-based RoleMatch dashboard to visualize personalized job recommendations and top-matched roles in real time.

EDUCATION

Master of Computer Applications, Gandhi Institute of Excellent Technocrats, Bhubaneshwar 2024-2026
Bachelor of Computer Applications, Regional College of Management, Bhubaneshwar 2019-2022
